## ABOUT US

**Keycoinet is a registered digital asset investment firm based in the Canada. The fund started as a way to reinvent investment strategies for token sales. [keycoinet.com](https://keycoinet.com) only invests in early token sales that pertain to an actual business, and not Initial coin offerings of tokens without interaction of a product or business. We enable users to enter the crypto market with no learning curve required, and help build diversified portfolios with the goal of maximizing returns while maintaining their preferred risk profile.**

# Let's start business with us

keycoint.com was founded on a simple but revolutionary idea that an investment company should be managed for the exclusive benefit of its investors. And so, keycoint.com was designed to be different, removing outside owners and outside interests from the equation. Due to our investor-owned structure, keycoint.com success can only be measured by your success.

# WHAT WE DO

## SELECT ASSETS

We carefully select financial assets and their instruments, which have a high record of performance, and great future prospects. We then offer these assets to investors.

## TRADE ASSETS

We have a team of seasoned traders and market analysts who handle trades on behalf of our investors. Our traders combine analysis from artificial intelligence with human expertise.

## MANAGE ASSETS

We manage these trades on behalf of our investors, provide guidance to them on how to reinvest or plan for future financial security, and generally how to achieve their wealth goals.
